Gotta say... I really liked this except for a few things i'll point out at the end.

The game atmosphere is really dark and scary - But the game shines on the game design itself: It is hard, but really fun. I like point and click adventures a lot, and The Rabbit Hole mixes that with an intense escape the room experience while making it hard with awesome puzzles.

The biggest downside is that the vive controllers are not really good... However since this is an Early Access game, and the developers themselves are promising roomscale and better motion controls. I recommend it with that in mind.. This game is broke as hell.

The map is illegible, much of the room naming is misleading to the point that it's hard to discuss this game with others, and it's pretty easy to get irrevocably stuck. I had to restart *1000 Amps* twice (and take multiple years away from it to rebuild my patience) in order to finish it.

*But it's such a good concept that I have to recommend it anyway.. Can be donald trump 10\10 IGN. GOTY 2018 please make more. Pretentious artsy black and white art style, jazzy music, and silly premise all used to cover awful slow responding controls. There is a legit 1 second delay to each command including just moving forward, which is inexcusable in a game that is asking for precise jumps and timing with fast moving spikes.. Game would be fantastic, and would absolutely recommend... But encountering constant ERROR after you die two or three times, and boots you out of the level losing all progress!!! :/*

*Please update ASAP!!!*

*Please update ASAP!!!. It's so bad, it's good okay.*

I played a lot of 2070, i like the way taken for 2205. I own Gold Edition of the game with Tundra and Orbit DLCs. Frontiers DLC is a huge add on for Anno 2205, but was never meant to be part of the season pass. I don't understand the need for bad reviewing this DLC that is meant to play the role of an extension pack, like anno 2070 with Deep Water. My only regret is that they could take the game farther by adding more planets and more game changing factors.. Super cool game! I love it! Gameplay is easy - player can move with WASD. Aiming is automatic. To shoot you need to enter the right answer. You can dodge from enemy bullets with your WASD.

6+4 V 10!. The best DLC of Fallout 4 imo! It has far greater music than Fallout 4, more interesting story and more creatures! And the role-playing of Fallout 4 improves with this just because of one interaction when a synth asks you if you are a synth and with the shown lore of Fallout 4 and Far Harbor it IS possible. So you can decide that you are a synth if you want to.. Hilarious, looks good, fun, its a PERFECT mix of everything.. Do not buy this add-on, it is terrible. There is no documentation or manuals and the auto pilot is a joke without them. You can only increase the airspeed, altimeter, course or heading. The knobs do not allow you to decrease any setting. There is no real world checklist as advertised.. Another one of those all around fun games. For best experience, use a gamepad, not a mouse. A lot goes on in this game, music is good, can be a bit overwhelming at times, and some levels are a bit frustrating, but overall, I would recommend this game to anyone. Great time killer and easy to put back down again.. i'd rec everyone to buy Season pass . each dlc from Steep is just amazingly fun 10/10. This is a good time!

The gameplay is actually quite simple once you get the hang of it. You are a robot that has starting skills and you can keep doing missions to get points to apply to those skills. The skills are explained in the game and aren't complicated.

The music I personally find catchy and the controls are intuitive. The graphics some might knock but they're a style on their own.
