Great game.. The game mechanics, ideas and its overall feel are great but it's just too buggy to enjoy.

Everything gets lost here at death but the game compensates it by letting you open treasures based on your stats at death, so you can start a new game with a new hat, character race or companion that buffs the character and makes your next run easier. At least in multiplayer, me and my friend dying often resulted in nothing, forcing us to quit the game without any takeaway.

Magicite would be great if there were mods to fix the bugs, but since there are none, there's just no way to recommend it in its current state, especially since the developer released its last "end-of-life" update in 2016.. Can't recommend it in its current state.. Very very nice! all area is beautiful round South Florida in AeroflyFS2.

But I missing animated aircraft very much.

I hope I can se animated airplane in a near future.

what say team AeroflyFS2 about animated airplane ?

Good work Team AeroflyFS2.. DO NOT BUY, STAY WELL CLEAR EVEN IF OFFERED FOR FREE.

I wish I never purchased this app. It has caused me hours of frustration.

At first it worked fine, but I noticed my game frame rate had reduced by 10-20fps. So I decided to force the game into full screen and see the comparison in fps. My screen flickered from window to full screen back to window then full screen, etc etc, then the game crashed.

So I rebooted my pc and tried running Magic Borderless again, only to receive a error message (An error occurred while updating Magic Borderless).

I am not able to get the software to work, and what is even more annoying is I am also not able to uninstall or reinstall the software. I think I have spoken every swear word that exists in the Oxford dictionary and the Urban dictionary because of this piece of \*@# .

. After the main story line, made it my goal to complete the achievements. Would recommend to disable the "invasions" before playing as they take up a lot of time and aren't that fun after the first couple. Additionally, you don't have once "city " to control, there are multiple areas and the load times between areas can become quite annoying once you get pretty far in the game; I'm sure you can modify the visual settings to help but I was to lazy to do that, xD. Overall a good game.. Beautiful bird and and fun to fly, imo exceed sabre in every way (service ceiling, climb rate, cannon caliber and its look are superb) however nothing to play with yet in 2.2 and with deferred shading on there are flashy glitchy textures, hopefully it would be fixed in the upcoming 2.5

Great & fun game that deserves a waaaay bigger playerbase :). Just wonderfull assistant that will not leave you bored for a day. Just turn any music whatever you want, and you will get a positive charge for whole day.

. Well, it's a nice little game. Colourful graphics, good soundtrack. Good for some spare-time fun.... An interesting plot based on H.P. Lovecraft overcome the fact that is quite short and easier than expected. Not as good overall as Shadow of the Comet but at least there are some technical improvements.. Resident Evil 7's Banned Footage Volume 2 focuses on 3 categories 2 being mainly mini-game driven the other story. First being Jack's 55th Birthday which is a fun speed game making you focus on specific weapons and inventory management as you have to struggle through 6 different levels to get enough food for Jack in a timely manner to get a good grade. 21 which is a killer blackjack game. It's blackjack but you will die if you lose. Has lots of fun with trumps cards and rewards I explain later. Last is Daughters which focuses as a prequel to the base game's story showing the first moments of the Baker's becoming possessed. With that you have honestly 3 mini-game like sections and a story section, each are about an hour long others can be longer as some have replayability.

+21 is essentially just blackjack but has three categories in its own. The first is a tutorial/story driven category. After this though the game gets more intense introducing Survival which puts you up against 5 opponents to win. Then Survival+ which is 10 opponents in a row. Super challenging and mostly fun.

+21 is RNG based with the cards you get.. I don't know honestly if this is a pro or con but ok.

+21 similar to Nightmare has rewards which can be unlocked to earn new trumps cards

+21 focuses very heavy on trump cards so much that you have to center your game around them to almost win which is really entertaining

+Daughters is a fun prequel to the base game displaying the Baker's before the possession and the events of the possession at the first glance.

+Daughters has 2 endings

+Jack's 55th is really funny I liked the music, Jack's outfit, and Mia's voice lines are pretty hilarious.. Especially the molded and their little hats

+Jack's 55th is a good challenge and takes time to try and master all the levels to try and get S rank

+Upon completing a map you unlock rewards in Jack's 55th to help in other maps

+Completing S unlocks cSS

-I'll be honest with you 21's me the off and quite honestly was one of the most challenging moments in the whole game. I mean you definitely can't play it without being going through all difficulties. The base 21 category isn't that bad but Survival and Survival+ hits you super hard with some mega bs. Your opponents are given specific trump cards and sometimes at ridiculous amounts. Especially the final bosses which have specific trumps cards of their own which are mega bs. Shouldn't even be able to have a such trump cards. Just is super annoying going through all 10 opponents only to deal with bs after bs trump cards in the final round. Seems that they also purposely tie you a lot. Finally it's just annoying in Survival+ to have to win 10 rounds against 10 opponents.. Way to long especially when they purposely give you less double damage cards and even when you get one they always use a shield card. FFS

-Daughters DLC adds some major plot holes to the story and makes it seem better to have not be included because it's up the story. The Baker's becoming possessed with what seems like minutes after Evie's arrival. Yet in notes found in the lab in the base game it details how possession is in a form of infection and that it takes a slow time to progress to a fully possessed being. Obviously the Daughters story disregards this by having the Baker's turning with what seems instantly. The notes in the lab even detail several stages and it seems as if that the Baker's skip 1 & 2 and go right to 3. ...Oddly enough another note in the lab contradicts this? By stating that the infection is fast. This isn't a for sure contradiction but is just confusion because we have two opposites in the same place! If you were to go off of the idea that the note detailing the possession be instant why is there several notes of Marguerite's saying that she's feeling weird and going to the doctors stating that there's mold in her brain and needs it removed. This is a 100% confirmation that she was possessed and then wasn't and went to the doctor. But the Daughters shows her possessed from the beginning? Confusing. Another idea is that the Baker's are only possessed at night and is why everyone is fine at the end of the good ending and perhaps is why Marguerite goes to the doctor.

-Why is Zoe recording?

-How did Zoe & Lucas not get possessed?!

In the end Banned Footage Vol. 2 is quite the hassle tbh with Jack's 55th being pretty meh I honestly just played through

---

it all once and just looked up a guide and followed it step by step to get S rank on every map. 21 is fun and can be toooo challenging and very frustrating. Daughters shouldn't have even been added to the game with its plot holes but still cool. In the end if you're thinking of not getting one of the DLC's it'll be this one.. I only paid 10 cents. Well still better than a csgo skin
